

Telecommunication Solutions

The First Name in Nickel Metal Hydride Battery Solutions®

COBASYS Solutions for Everyday Needs

During a power loss or failure, Cobasys NiCOM products provide back-up power and energy in Central Offices (CO's) and Outside Plants (OSP) and assure you never lose a telephone call.

NiCOM[®]

"Based on Proven Nickel Metal Hydride Technology, the NiCOM Product Line for Telecom Provides Application Optimized Solutions for Around-the-Clock Protection!"

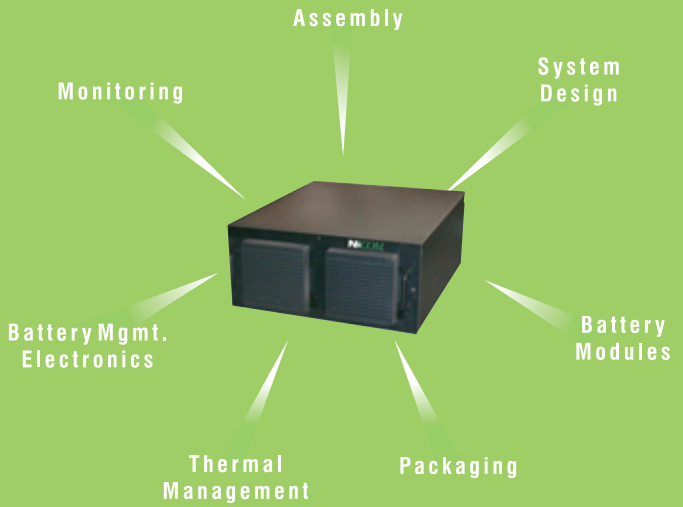

Why Choose COBASYS NiCOM Products?

Cobasys provides Nickel Metal Hydride (NiMH) energy storage solutions based upon our patented technology. Many years of development have resulted in safe, reliable and environmentally benign solutions for indoor and outdoor telecommunications applications.

These solutions are compatible with your existing architecture and can meet the energy needs in

wireless, wireline and cable applications. NiCOM systems can be delivered quickly and installed on site with minimum effort.

Tele

Why Nickel Metal Hydride (NiMH)?

The choice is clear when the requirement calls for a durable, low maintenance battery system that provides long life over a wide range of environmental conditions. Cobasys NiMH batteries are the technology of choice for demanding telecommunications applications.

communication
Battery Solutions

Performance

Our solutions last longer than conventional battery systems. NiMH technology provides high energy storage density, which means more energy in a smaller space. Cobasys has integrated electronics to maximize the benefits of this technology and ensure optimum performance. NiMH long life ensures reliable service and lower life cycle costs.

Safety

NiMH batteries do not expel dangerous gases to the environment under normal operation, so there is no need for specially constructed rooms, ventilation or support systems.

Environmental

Our NiMH batteries are made from materials that are environmentally benign.

All of our batteries are recyclable - in line with our company pledge to be good stewards of the environment.

Best Value

Cobasys NiCOM systems provide the complete solution with a lower total cost of ownership!

- Significantly longer cycle life
- Easy integration into existing battery systems and products
- Dependable operation over a wide temperature range
- Fully integrated battery system monitoring

World Class Manufacturing

Cobasys' battery systems are manufactured in a fully automated, state-of-the-art facility located in Springboro, Ohio. Our manufacturing plant has the capacity to meet the growing demands of telecommunications service providers.

Low Maintenance

Our battery systems are designed and tested for low maintenance and worry free operation. NiMH batteries are self-contained and do not require watering.

Quality

Quality is at the heart of all of our company's operations. We set the standards for quality and reliability. Cobasys has obtained ISO 9001: 2000 TL 9000; TS 16949; ISO 17025 and ISO 14001 certifications which confirm that our products are manufactured to the highest quality and environmental standards in the industry.

NiCOM - Reliable Product System Solutions

NiCOM EBM

The NiCOM Electronic Battery Module (EBM): is offered as a 24-volt and 48-volt system; weighs under 50 lbs.; and is equipped with handles that make it easy to transport, handle and install. The NiMH NiCOM EBM is designed to directly replace conventional batteries with front terminal access for ease of installation and require no changes to existing rectifiers or power systems.

NiCOM ESS

The NiCOM Energy Storage System (ESS) is designed to allow flexibility of single or multiple battery storage configurations. The system is designed to maximize efficiency and space. This unique, modular design allows for simple installation of 48-volt systems into standard telecommunications racks. The NiCOM ESS can be easily configured to meet your needs of today and grow with your needs of tomorrow.
