

COBASYS Solutions for Everyday Needs

COBASYS provides NiMH batteries based upon our patented technology. Many years of development have resulted in a safe, reliable and environmentally responsible battery solution to address the concerns of energy storage and reliability.

Reliable Battery System Solutions

NiGEN™

COBASYS NiGEN systems are designed to allow flexibility of single or multiple battery storage configurations. The system is designed to maximize efficiency and space. This unique, modular design allows for simple installation into standard 19" and 23" racks. NiGEN systems can be easily configured to provide the amount of back up time you need.

Energy Storage Systems

The First Name in Nickel Metal Hydride Battery Solutions

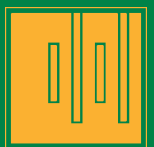

Why COBASYS?

We provide highly reliable total system solutions for Distributed Generation, Bulk Power and Portable Power applications that have been designed to be safe and environmentally benign. These solutions include "plug and play" components that meet the power and energy needs of critical applications. Compact NiGEN battery systems can be delivered and installed quickly and conveniently.

Why NiMH?

The choice is clear when the requirement calls for rugged, low maintenance battery systems that provide long life in a wide range of environmental conditions. COBASYS NiMH batteries are the technology of choice for demanding power supply applications.

NiGEN™

The right choice for Emergency Lighting, Peak Shaving, Load Leveling, and Back-up Power Applications

Outstanding Performance

- Long life
- High energy storage
- High reliability

Economical

NiGEN systems by COBASYS save you money!

- Significantly longer life batteries
- Smaller footprints that can reduce your floor space needs by as much as 4 times
- Easy integration

Safety

COBASYS NiMH batteries are completely sealed, non-carcinogenic and abuse tolerant. They are safe, predictable and tested for worry free operation.

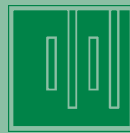

Environmentally Benign

NiMH batteries will not pollute the environment - unlike other battery chemistries.

All of our batteries are recyclable - in line with our company pledge to be good stewards of the environment.

Integration

COBASYS NiGEN battery systems are designed to provide greater flexibility and easily integrate into existing customer battery systems and products.

High Reliability

COBASYS NiGEN Battery systems are designed to deliver reliable, predictable performance every time!

World Class Manufacturing

COBASYS NiGEN battery systems are manufactured in our fully automated, state-of-the-art manufacturing facility located in Springboro, Ohio.

Low to No Maintenance

Our NiGEN battery systems are designed to be robust, allowing for lower operational costs. NiGEN systems include integrated monitoring capability to minimize maintenance time and procedures.

Quality

Quality is at the heart of all of our company's operations. We intend to set the standards for quality and reliability. Our manufacturing facility has obtained ISO and QS certifications confirming that our products are manufactured to the highest quality standards in the industry.
